Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4, 13 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by McCullough.

The central section is item 13, the left and right end cushion sections are 11 and 12, the hinges are 102 and 103.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 3, 5 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over McCullough as applied to claim 1 above, and further in view of Pender.

Pender teaches a fluid filled cushion with an attachment strap that is releasable and adjustable to be old and well known in the art. It would have been obvious to one of ordinary skill in the art to modify the McCullough cushion such that it were fluid filled and had a strap as taught to be old by Pender thereby providing the obvious advantage of compact storage and secure attachment to a user, respectively, thereby providing structure as claimed.

Claims 15-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Crowley.

Crowley teaches a cushion configured to fit in the lap of a person feeding an infant comprising a central section, a securement strap 90 that is adjustable and securable to the cushion wherein when the person is in a sitting position substantially as claimed except for an explicit recitation that the cushion falls to a vertical position when the person stands up; however, depending on how tightly the strap is secured around the users waist, the cushion will necessarily rotate to a vertical position about the point of attachment of the strap to the cushion due to the force of gravity.

Allowable Subject Matter

Claims 7-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Rempp, Tandrup, Marcotte, Van Vuuren, Moe et al, Bartley et al, Williams and Beyley all teach devices similar to that of the instant invention.
